Janmaijay Jaiswal

Aspiring Software Engineer

Kanpur, Uttar Pradesh · +91-7800004408 · janmaijayjaiswal01@gmail.com

LinkedIn · GitHub

Summary

A quick-learning and analytically-driven aspiring software engineer with a strong foundation in Python, C++, SQL, and core data structures & algorithms. Comfortable across the stack – from writing efficient algorithmic code to designing schemas, building REST APIs, and validating them end-to-end. Seeking a Software Engineer role to apply and grow my technical skills while contributing to real-world, production-grade systems.

Education

Pranveer Singh Institute of Technology, Kanpur 2023 – 2027

B.Tech – Artificial Intelligence & Data Science

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Python Programming, Statistics

Internship

IBM PBEL Virtual Internship – Cloud Computing 2026

In collaboration with NASSCOM & MeitY (Ministry of Electronics & Information Technology, Govt. of India)

- Selected for IBM's Practice-Based Experiential Learning (PBEL) program, gaining hands-on, guided exposure to cloud computing, containerization, and DevOps practices through mentorship and industry-relevant project simulations.
- Applied concepts learned during the program – Docker, microservices architecture, and CI/CD – to independently design and deploy Smart Mart, a 5-service platform, from local development through to cloud deployment.

Projects

Smart Mart – Microservices E-Commerce Platform 2026

Python, Flask, React, Docker, Kubernetes, PostgreSQL, GitHub Actions (CI/CD)

- Architected a microservices-based e-commerce platform with 5 independent services – auth (JWT), product catalog, cart, order, and payment – each with its own Flask API.
- Built the frontend in React and containerized every service with Docker Compose for local orchestration; deployed the stack with Kubernetes.
- Set up a CI/CD pipeline using GitHub Actions to automate environment configuration and deployment to Vercel.
- Used PostgreSQL as the shared relational database across services, exposing 5 REST APIs on ports 5001–5005.

NextScrimz – E-Sports Tournament & Scrims Platform July 2025

Node.js, Express.js, EJS, MongoDB, Socket.IO, Cashfree, Koyeb, Vercel, GoDaddy

- Built a full-stack e-sports scrims and tournament platform using Node.js, Express.js, and MongoDB, with EJS-rendered views and real-time match/lobby updates powered by Socket.IO.
- Integrated the Cashfree payment gateway for tournament registrations, and deployed the app with the backend on Koyeb and frontend on Vercel, served through a custom domain configured via GoDaddy.

Rasoee – AI-Powered Meal Platform (Data & Backend Layer) Aug 2025

Python, Pandas, NumPy, SQL

- Designed structured datasets and wrote SQL queries to extract, filter, and aggregate meal demand patterns for a recommendation engine.
- Built an ETL pipeline to clean raw data, feed a downstream analytics layer, and optimize query retrieval efficiency.

Technical Skills

- **Languages:** Python, C++, SQL
- **Backend & APIs:** Flask, SQLAlchemy, REST API design & testing (Postman), microservices arch, JWT auth
- **Databases:** PostgreSQL, MySQL – CTEs, window functions, joins, subqueries, indexing, query optimization
- **Core CS:** Data Structures & Algorithms (arrays, graph traversal/DFS, cycle detection), OOP, DBMS
- **Cloud & DevOps:** Docker, Kubernetes, GitHub Actions (CI/CD), AWS fundamentals (RDS, EC2, S3), Oracle Cloud, Vercel, Linux CLI, Git/GitHub

Certifications

- Data Analytics Virtual Experience – *Deloitte*
- Cloud Infrastructure 2025 AI Foundations Associate – *Oracle*
- Introduction to Data Science – *Cisco Networking Academy*
- Exploratory Data Analysis – *FutureSkills Prime, MeitY–NASSCOM*
